Dear Colleague,

I have nothing to do with G. Heise's conference on quantum mechanics, and do not even think that such a large and diffuse conference is a good idea, as I told him explicitly. He turned up here uninvited, and - after a few days - unwelcome. He asked me many questions about who had done what, and about their addresses, and I answered as well as I could till my patience ran out. I am sorry now to have given him even this much help.

If Heise turns up at your institute, I recommend that you do not give him the name of any colleague, do not help him with a hotel booking, do not lend him any money, and expressly forbid him the use of your stationery.

With best wishes,

John Bell

J.S. Bell

He told me that Wigner was now
co-sponsoring his meeting. But I
would need to hear this from Wigner!
